PROJECTS

Personal Portfolio | *Frontend Development* ⬤   August 2023
- Responsive and beautiful website showcasing my personal work and professional achievements
- Experiment with HTML, CSS, JavaScript
- Adaptive for all sizes of screen devices
- Available in light mode as well as dark mode

DevDectector | *Development* ⬤   October 2023
- A JavaScript-based web application that allows users to input a GitHub username and retrieve the corresponding user's GitHub profile information..
- An external API used to fetch GitHub user profile data.
- The application offers a dark mode feature, allowing users to switch between light and dark themes for better readabilityl

Weather App | *Development* ⬤   September 2023
- Engineered a Weather app using Vanilla JS and the Open Weather API..
- The app enables users to access real-time weather updates based on their location and input, resulting in an improved user experience and engagement.
- Ideal for planning outdoor activities and making decisions based on hyperlocal weather conditions.

EXPERIENCE

Bharat Intern | *Internship(Virtually)*   September 2023 - October 2023
